### About Me

As a designer with both a technical and creative background, I am uniquely positioned to effectively communicate my designs to development teams. I know that diving into pixel perfect designs are just as important as analyzing the big picture, and I am always looking for an opportunity to learn something new.

### Work Experience

#### **Avanade, Inc. // UX + UI Designer**

July 2017 – Present, New York City

- Designing responsive dashboards, internal sites, and web/mobile applications for a variety of clients in agile development cycles.
- Responsible for designing and maintaining wireframes in Sketch with accompanying interactive Invision prototypes.
- Leading design workshops where I discuss the best user-centered design practices and ideate using design thinking practices.
- Collaborating daily within a variety of teams consisting of designers, product managers, stakeholders, and developers both on and off shore.
- Presenting design decisions, wireframes, design systems, functionality documents, and prototypes to clients, stakeholders, and senior leadership on a regular basis.

#### **The College of New Jersey // Web Developer**

May 2015 – May 2017, New Jersey

- Developed and maintained 500+ webpages for the college with WordPress, HTML, CSS, and JavaScript.
- Organized and maintained information architecture for seven different departments, keeping them efficient and consistent for user paths.
- Collaborated directly with the Deans, Professors, and Chairs of each department on their website requirements.

#### **Avanade, Inc. // User Experience Design Intern**

May 2016 – August 2016, New York City

- Developed wireframes and prototypes on various innovation projects throughout the summer that improved user experience technical skills, presentation skills, and design thinking, working with global clients including Delta Airlines and Volvo Cars USA.
